Description

16A wide switch with pilot light Simon 27 snow white SIMON 27212-65

The **Simon 27** series is one of Simon's most versatile and colorful mechanism series. It features a wide range of interchangeable frames and covers to best adapt to the needs of each project.

Although the mechanism is shared across the different variants of the series, the frames offer a wide range of possibilities.

On one hand, there is the classic **Simon 27** series, with frames featuring intermediate and external trim pieces, with more rounded finishes.

On the other hand, there are the frames of the **Simon 27 NEOS** series, finished in matte or glossy glass, with soft and bold colors giving it a completely different look from the classic series.

Finally, the **PLAY** range changes the appearance of the frames, available in two colors, white and Marfil, but with a multitude of interchangeable covers ranging from the simplest to the boldest and most unrestrained.

In addition, this mechanism is also suitable for the **Simon 44 Aqua** series, Simon's waterproof series.

Specifications

Colour	White
EAN	8421053035696
