Product sheet

Brand: SIMON

Reference: SIMON 40000191-030

VGA + female-female mini-jack connectors with pigtails and integrated plate, white, Simon 400. VGA + female-female mini-jack connectors with pigtails and integrated plate, in white, belonging to the Simon 400 series. Simon 400 is a range of mechanisms perfect for both flush and surface mounting, whose main feature is offering innovative aesthetics that allow it to integrate perfectly into all types of environments. Another highlight of the Simon 400 series is that it is available in two versions: with or without cover. The cover allows for greater aesthetic integration by hiding the connections. Cleaning this VGA connector is very easy, as you only need to wipe it with a soft, dry cloth, without ever using abrasive cloths or cleaners containing chlorine, which could damage the connector and prevent it from functioning correctly. Additionally, this connector can be installed in places with temperatures between -5 and 60ºC, although it can withstand even higher extreme temperatures, making it ideal for all types of climates.
