Product sheet

Brand: SIMON

Reference: SIMON ALK1100/8

Single-face aluminium column, 3 metres in length, Simon K45. A magnificent large-sized aluminium column manufactured by the renowned Spanish brand Simon. With dimensions of 3000x70x60mm and one face featuring fifty wide modules, it becomes one of the most comprehensive solutions for the most demanding connection needs. The Simon K45 line offers one-face, two-face (square and oval), and four-face versions. It is worth noting that the single-face column does not include extensions to increase the final length of the assembly. If required by the customer, single-face columns of greater length can be manufactured upon request. It is supplied with a 0.5-metre telescopic guide for pressure-based fixing to the slab, requiring no threading, which allows the column's fixing height to be extended up to 3.5 metres. It is made of high-quality anodised aluminium, providing greater corrosion resistance and a metallic finish.
