Product sheet

Brand: SIMON

Reference: SIMON KS11/14

Schuko socket base 16A 250V with safety shutter and quick connection, graphite Simon K45. This Schuko socket base 16A 250V features a safety shutter and offers a quick connection system. It is suitable for surface and flush mounting. With a graphite finish, the component is part of the Simon K45 series, a collection designed to promote connectivity in any space. It has 2 modules and dimensions of 45x45mm. Regarding its manufacture, it is composed of metallic elements with thermoplastic insulation. Among the qualities of this material is that it is self-extinguishing and halogen-free, thereby preventing flame spread in case of fire. The component has exceptional thermal resistance and can be installed in environments between -5 and 60º. In case of loss or breakage of the pin, a replacement can be requested using reference AC33/6. For cleaning, it is sufficient to use a soft, dry cloth. It is recommended not to use abrasive products containing chlorine.
