# Product sheet

Brand: SIMON

Reference: SIMON K11/27

Schuko socket base 16A 250V with safety device and quick termination green Simon K45. The Schuko socket base K11/27 from the Simon K45 series features dimensions of 45x45mm and an advanced safety device with 2-module quick connection and original finishes in green. Our component is designed with halogen-free metallic materials that feature self-extinguishing thermoplastic insulation to ensure that, in the event of a fire, the flame does not spread and there is low toxicity in case of smoke emission. Furthermore, it is compatible with elements of up to 250 Volts of voltage and 16 Amperes of intensity and offers the possibility of linking socket bases without having to strip or twist the cables using reference AC11. Indeed, the Simon K45 collection is characterized by being the perfect solution for our most demanding customers, guaranteeing the highest quality and constant innovation in our products, always complying with European regulations. Because at Simon we care about providing the greatest safety for your home.
