Product sheet

Brand: SIMON

Reference: SIMON K02/8

French socket base 16A 250V with safety device and screw terminal, aluminum, Simon K45. Achieving total safety in electrical installations is possible with the Simon K45 series. The French socket base with safety device and screw terminal in aluminum color included in this range can certify it. With a current of 16A and a voltage of 250V, this product has dimensions of 45x45x39mm. This socket base accepts a cable cross-section of 1.5 to 2.5mm and a cable stripping length of 12mm, being suitable for surface and flush mounting. But in addition to being very safe, this item stands out for its resistance to the negative consequences of impacts and blows thanks to the metallic components with self-extinguishing thermoplastic insulation and free of halogens with which it has been manufactured. These materials guarantee non-flame propagation in case of fire and low toxicity in case of smoke emission.
