Product sheet

Brand: SIMON

Reference: SIMON KL02/6

French socket base 16A 250V with safety device, luminous indicator and red screw mounting Simon K45. Belonging to the Simon K45 series, we find this French socket base. It is presented in a bold red color and features a luminous indicator and an individual safety device. This is an individual base composed of two modules, suitable for devices up to 16 Amperes and 250 volts. Its dimensions are 45x45 millimeters and 39 millimeters in depth. This device is installed in the traditional manner, using screws, but incorporates modern technology that reduces fire propagation and smoke toxicity. This is possible thanks to the materials used in its manufacture, which are metallic, halogen-free, and have self-extinguishing thermoplastic insulation. Cleaning is also simple and consists merely of wiping the base with a dry cloth, without the need for any additional products. The Simon K45 French socket base in a beautiful red color is perfect for warm environments and similar tones.
