Product sheet

Brand: SIMON

Reference: SIMON KL02/14

French socket base 16A 250V with safety device, luminous indicator and screw terminals, graphite Simon K45. In the Simon K45 collection, we find this French socket base, with luminous indicator and graphite finishes. The base is compatible with elements of 16 Amperes intensity and 250 Volts voltage, and with graphite finishes. It is made of metallic materials of self-extinguishing thermoplastic and free of halogens, to guarantee its safety against possible fires by slowing down the propagation of flames and smoke toxicity. This base with earth connection, has a luminous indicator to control, in a useful and simple way, the switching state, and signaling function, facilitating its location. Two functionalities that increase the efficiency and comfort of your stay. In addition, with screw terminals, its installation can be done both surface-mounted and flush-mounted, depending on the specific aesthetic needs of each area. The Simon K45 collection represents innovation, efficiency and style for all types of spaces.
