# Product sheet

Brand: SIMON

Reference: SIMON K22/27

French socket base 16A 250V with safety device and quick termination green Simon K45. French socket base, 16A current and 250V voltage. This socket base features a safety device and quick termination. Choose a modern finish in green color, part of the Simon K45 series. It is the individual version, two modules, without monobloc. Its dimensions are 45x45 millimeters and 42.3 millimeters depth. It operates by insertion and does not include any signaling function. Notably, this socket base can be connected directly without stripping or twisting the cables, via reference AC11. The Simon French socket base accepts a cable cross-section between 1.5 and 2.5 millimeters and requires a cable stripping length of 12 millimeters. It can be installed surface-mounted or flush-mounted in the wall. Its manufacturing materials are metallic components with thermoplastic insulation, halogen-free, capable of withstanding highly variable and extreme temperatures, ensuring non-propagation of fire.
