Product sheet

Brand: SIMON

Reference: SIMON K22/8

French socket base 16A 250V with safety device and quick termination, aluminum, Simon K45. The Simon K45 socket base series focuses on high-quality and highly safe products. This is the French socket base, rated at 16A and 250 V. It features a safety device and quick termination. The finish of this product is aluminum, giving it great elegance, suitable for installation in any valued space. This is the individual version, two modules. It has exact dimensions of 45x45 millimeters, with a depth of 42.3 millimeters. It has no signaling function and operates by insertion. It accepts a cable cross-section between 1.5 and 2.5 millimeters and a cable stripping length of 12mm. However, it is possible to link the socket bases of this series directly, without the need to strip or twist cables. For this, it is necessary to have reference AC11 from the Simon catalog. It is manufactured from metallic components, insulated with self-extinguishing, halogen-free thermoplastic. This provides it with very high quality and great safety, as it inhibits flame propagation in case of fire.
