Brand: SIMON

Reference: SIMON 82579-38

Tilted voice and data plate with dust cover for 2 RJ45 connectors graphite Simon 82. Having two connectors in a single piece allows us to increase its functionality without increasing the space allocated for this purpose. The tilted voice and data plate with dust cover for the RJ-45 format graphite from the Simon 82 series features this characteristic. Being suitable for surface and flush mounting, it is a universal adapter with dimensions of 55x55mm available in three different finishes. The recommended temperature range is 5 to 40° C, but this plate perfectly withstands temperatures from -25 ° to 50° C, with magnificent performance in all types of environments. All with an unbeatable quality-to-price ratio. To clean it without affecting the thermoplastic materials it is made of, a soft cloth slightly dampened with soapy water is sufficient, avoiding the use of cloths and/or abrasive cleaners containing chlorine.
