Brand: SIMON

Reference: SIMON 82579-30

Tilted voice and data faceplate with dust cover for 2 RJ45 connectors, white, Simon 82. In white and from the Simon 82 series, we offer this tilted voice and data faceplate with dust cover for 2 RJ45 connectors. It is available in 3 different finishes, allowing you to find the one that best suits your needs. For a better match, Simon recommends that the frame be the same tone as the faceplate's base. This faceplate, measuring 55x55mm, can be recessed or surface-mounted, as it is suitable for both. It is made of thermoplastic to ensure high quality and can operate optimally at temperatures between 5 and 40°C. It can even withstand extremes of up to -25 and 50°C. For proper maintenance, it is recommended to use a soft cloth previously dampened with a soapy water solution, always avoiding any product containing chlorine in its formulation due to its high abrasive power.
