Brand: SIMON

Reference: SIMON 82578-30

Tilted voice and data plate with dust cover for 1 white RJ45 connector Simon 82. The tilted voice and data plate with dust cover for one white RJ45 connector from the Simon 82 series perfectly combines simple functionality, innovative design, and maximum safety. Its installation, which is carried out in a comfortable and simple manner in just a few minutes, can be performed in a universal flush-mounted box or, alternatively, in a surface-mounted socket. This is a universal adapter with dimensions of 55x55mm, available in three different finishes, so we always recommend choosing a frame with the same color as the socket of the selected plate. To clean it without affecting the thermoplastic materials it is made of, a soft damp cloth is sufficient. With this simple maintenance, we will keep its structure free from the oxidation that typically occurs due to ambient humidity and temperature. All this with an unbeatable quality-to-price ratio.
