Brand: SIMON

Reference: SIMON 75088-30

Simon 75 white adapter plate. In a 45x45mm square size, we present this element adapter, finished in white, for the Simon 75 series. This plate is made of thermoplastic material and does not include any engraving. For proper installation, the use of a universal flush-mounted box is required, or alternatively, a surface-mounted socket. It is also available in marfil and graphite colors. It is recommended that the frame chosen for this piece has the same color as the socket of the selected tecla. With the Simon 75 collection, the habitability of different spaces improves substantially because it precisely responds to the needs of each room. Various colors in the same frame will facilitate multiple combinations to form the ideal ensemble that best adapts to the different needs of users. Instructions for proper cleaning: use a soft cloth slightly dampened with soapy water.
