Product sheet

Brand: SIMON

Reference: SIMON 82088-33

Aluminium adapter plate Simon 82. With a single gesture, we can change the frames of the elements that make up the electrical systems in our homes or business facilities. The aluminium adapter plate from the Simon 82 series, suitable for both surface and flush mounting, is perfect for this. In addition to this tone, this plate is available in five other different finishes. The safety with which it has been manufactured, complying with the UNE-EN 60669-1:2002 + A1:2003 + A2:2009 standard, is an added benefit, as is its price. The recommended temperature range is 5º to 40º C, but this plate can perfectly withstand temperatures from -25 º to 50º C, with magnificent performance in all types of environments. For maintenance and cleaning, it is sufficient to use a soft cloth slightly dampened with soapy water, avoiding cloths and/or abrasive cleaners containing chlorine. Changing a system has never been so easy.
