Product sheet

Brand: SIMON

Reference: SIMON 47602240-138

Complete in-table kit with double-opening cover and metal wing, featuring 4 Schuko socket bases, 4 SAI-type bases, and a voice and data plate for 4 RJ45 connectors. It belongs to Simon's 400 series and has an elegant finish in black. It operates at a voltage of 250 volts and an intensity of 16 amperes. Thanks to this complete in-table kit, we can embed our connections in any type of space. This highly resistant piece is made of metal and features an anodized aluminum profile, which, combined with its painted steel enclosure, provides great resistance to all kinds of impacts. Simon strives to offer durable and safe products; therefore, to prevent accidents, its 400 series uses self-extinguishing, halogen-free thermoplastic for covers and fasteners, ensuring non-propagation of fire and no release of toxic fumes. To complete its installation, it must be combined with Simon 400 functions. Its maintenance is very simple, as a simple dry and soft cloth is sufficient to keep this kit looking like new.
