Product sheet

Brand: SIMON

Reference: SIMON 45505000-138

Complete kit for in-table installation with cover and cable exit through a metal wing. This kit includes a cover, a wing, and 5 Schuko socket bases. It belongs to Simon's 400 series and features an elegant black finish. Thanks to this complete in-table kit, we can embed our connections in any type of space. Simon offers an elegant and avant-garde way to have multiple elements while avoiding the use of long cables on the floor. This piece is suitable for voltages of 250 volts and intensities of 16 amperes. The kit's housing is made of painted steel, the profile of anodized aluminum, and the covers and fasteners of self-extinguishing, halogen-free thermoplastic, a very safe material that favors low toxicity (in case of smoke emission) and non-flame propagation in case of fire. Its installation is embedded in furniture, using the provided claws or with screws in the available holes.
