Product sheet

Brand: SIMON

Reference: SIMON 44602240-138

Complete in-desk kit with cover, brush, 2 Schuko socket bases and 2 SAI-type bases, and a voice and data plate for 4 RJ45 connectors. Part of Simon's 400 series, it features an elegant finish in black. Thanks to this complete in-desk kit, we can embed our connections in any type of space. Simon offers an elegant and avant-garde way to have multiple elements while avoiding the use of long cables on the floor, as the kit is pre-wired. The Simon 400 series is already a benchmark in homes and the most demanding workspaces. This piece is suitable for voltages of 250 volts and intensities of 16 amperes. The kit's housing is made of painted steel, the profile of anodized aluminum, and the covers and fasteners of self-extinguishing, halogen-free thermoplastic, which is a very safe material that favors low toxicity (in case of smoke emission) and non-propagation of flame in case of fire. Its installation is embedded in furniture, using the provided claws or with screws in the available holes.
