Description

Pool mesh 6x6m Leaf Pool Cover is an easy-to-install cover that does not need any fixing to stay above the water. The pool is kept clean of leaves and insects, allowing you to enjoy a swim when you remove it without spending time cleaning. During the hibernation season, it protects the pool until the next season. Its measurements are adapted to most prefabricated pools, and the lead rope that runs along its perimeter gives it a weight that allows it to stand without needing to be fixed. It is not necessary to drill the garden or terrace, or carry out any work for its effective and quick installation. It is made of high-density polyethylene (HDPE) monofilament fabric and has a polyamide rope with an inner core with a lead rosary.
