SIMON 10002621-138 | Vertical minimal frame with 2 elements and 3 glossy black modules

Brand: SIMON

Reference: SIMON 10002621-138

This minimal vertical frame with 2 elements, suitable for 3 modules, in black, from the Simon 100 series is the ideal base on which to support the rest of the mechanism parts. Here an effective and elegant black finish with a gloss effect and the best materials that guarantee great durability come together. Regarding its installation, you must take into account that it is suitable for embedding and that the direction of its installation must be vertical. The base is made of thermoplastic while the frame is made of Polymethylmethacrylate, more commonly known as PMMA, a material that, due to its aesthetics, transparency and resistance to scratches, is considered a lightweight alternative to glass. For hygiene, use a soft cloth slightly moistened with soapy water, do not use abrasive cloths and/or cleaners that contain chlorine.
