SIMON 10020208-230 | Front kit with 2 elements+base+TV+RJ45 matt white

Brand: SIMON

Reference: SIMON 10020208-230

The front kit for 2 elements with a schuko socket outlet and a single R-TV+SAT outlet, with 1 RJ45 6 UTP connector, is especially useful and functional in numerous projects, both at home and in commercial premises or similar. Finished in white with a matte effect, it presents a discreet and highly functional appearance. In addition, it is easy to install: the connection of the plug is made by means of a cut, with a simple click and that's it, without the need for tools or stripping cables. On the other hand, the terminal connection of the R-TV+SAT outlet must be done with a screw. This kit is suitable for recessed installation in any wall and in installations of up to 16A intensity for the plug, and R-TV+SAT sockets in accordance with current ICT regulations. With the kit you can have an RJ45 6 UT output for internet, the TV output, R-TV+SAT and a plug to give electrical output to any device that is connected. What the Simon 100 series kit does is to minimally group together different functions to facilitate installation and promote convenience when it comes to device connectivity.
