SIMON 28 | Push button with light 26160-39

Brand: SIMON

Reference: SIMON 26160-39

10A 250V pushbutton with built-in light and Simon 28 fast terminal connection system. This control mechanism belongs to the Simon 28 product series. It is a pushbutton for devices with current of up to 10Amps and 250V. It stands out for its simple fast terminal connection system. The button has a built-in indicator light that gives the mechanism a modern and up-to-date touch. But Simon products offer great versatility. In this sense, if you want to replace the indicator light, you can do it by combining it with the product with reference 31802-31. The operation of the button is extremely simple and it does so in a tilting way. Thus, it is a highly interactive and intuitive device for the user. Simon is characterized by its high quality products. This is achieved by using the best materials on the market in its manufacture. In this case, the button is made of metallic components with halogen-free thermoplastic insulation.
