

Product sheet

BERKER | Double push-button mechanism with toggle interlock 10A/250V 503520

Brand: HAGER

Reference: HAGER 503520

Double push-button mechanism with rocker interlock. Among its electrical characteristics, it has a nominal voltage value of 250V. It comes in dimensions of 70.8mm high, 70.8mm wide and 42mm deep. This product belongs to a series of mechanisms that complement the rest of the products belonging to the different Berker families, goods designed for the intelligent control of buildings.

Description

BERKER | Double push-button mechanism with toggle interlock 10A/250V 503520 What to know when buying the Berker electrical mechanism The Berker range of electrical mechanisms is common to all the following series: S.1, B.3, B.7, S.1, B.3, B.7, Q.1, Q.3, Q.7, K.1, K.5, Arsys, R.1, R.3, and R.8 The general structure of this complete mechanism is: Mechanism + frame + key or cover The modular system with the greatest number of aesthetics and types of materials. The breadth of shapes, colors and materials (glass, steel, aluminum, porcelain, concrete, ...) allows to combine the concepts of Quality, Functionality and Design. Suitable solutions for the decoration of any environment, in all its functionalities, both in conventional and electronic mechanisms and in building control and management. Berker electrical mechanisms < p> As the inventor of the modular system, Berker has a single mechanism for different aesthetics. The current mechanisms are left on the wall. Only aesthetic ones are substituted. Even if a control switch or an illuminated switch is desired, the mechanism is always the same. This means that: - There are no wrong mechanisms in the installation - Minimum stock - Long-term customer satisfaction Berker functionality and design Tried and tested modular design and Extremely flat angle of only 3.5° makes the switch look very flat on the wall. For ease of installation, the concept of Flexolift clamps was created. The claws snap flush and are automatically forced into position when released. On the back of the switch is a laser engraving of the circuit diagram, graphic symbol, and length of uninsulated conductor length required for connection.

Specifications

EAN	4011334030492
Manufacturer	Hager
Piece type	Electrical mechanisms
Series	Berker
