BERKER | Hollow Wall Toggle Switch 303650

Brand: HAGER

Reference: HAGER 303650

Toggle switch for hollow wall with dimensions of 71mm high and 71mm wide, as well as a depth and mounting depth of 41.6mm and 19.5mm respectively. It has nominal current and voltage values of 10A and 250V. This product belongs to a series of mechanisms that complement the rest of the products belonging to the different Berker families, goods designed for the intelligent control of buildings.

BERKER | Recessed wall switch 303650 What to know when buying the Berker electrical mechanism The Berker range of electrical mechanisms is common to all the following series: S.1, B.3, B.7, S.1, B.3, B.7, Q.1, Q.3, Q.7, K.1, K.5 , Arsys, R.1, R.3, and R.8 The general structure of this complete mechanism is: Mechanism + frame + key or cover < p> The modular system with the greatest number of aesthetics and types of materials. The breadth of shapes, colors and materials (glass, steel, aluminum, porcelain, concrete, ...) allows to combine the concepts of Quality, Functionality and Design. Suitable solutions for the decoration of any environment, in all its functionalities, both in conventional and electronic mechanisms and in building control and management. Berker electrical mechanisms < p> As the inventor of the modular system, Berker has a single mechanism for different aesthetics. The current mechanisms are left on the wall. Only aesthetic ones are substituted. Even if a control switch or an illuminated switch is desired, the mechanism is always the same. This means that: - There are no wrong mechanisms in the installation - Minimum stock - Long-term customer satisfaction Berker design and functionality Tried and tested modular design and Extremely flat angle of only 3.5° makes the switch look very flat on the wall. For ease of installation, the concept of Flexolift clamps was created. The claws snap flush and are automatically forced into position when released. On the back of the switch is a laser engraving of the circuit diagram, graphic symbol, and length of uninsulated conductor length required for connection. On the front, the reference of the mechanism stands out to be able to identify it very easily.

Specifications

High	71
Width	71
EAN	4011334238850
Manufacturer	Hager
Piece type	Electrical mechanisms
Series	Berker
