Product sheet

FERMAX 3233 | BASIC DUOX PLUS relay

Brand: FERMAX

Reference: FERMAX 3233

This relay allows you to perform the most basic and common functions: open a door, activate a light, etc. For more advanced functions not available in this relay, FERMAX has the DUOX PLUS relay ref. 3267. Programming is very simple, even if the factory default parameters are already those desired by the installer, you won't even have to program anything. Connect and go. Using jumper JP1, the relay can be programmed as: Block Relay (Default value: block=00): Only the devices in that BLOCK can activate the relay (panels, guard unit or monitors/telephones) General Input Relay: All users of the installation can activate the relay. The relay can be programmed to activate with the following actions: Door opening. F1 (default activation parameter). F2 Call from panel or guard unit. The relay activation time can also be programmed: [1 s., 99 s.]. The factory default value is 4s.
