**FERMAX 7399 | Audio module W
4+N Kit SKYLINE**

Brand: FERMAX

Reference: FERMAX 7399

Amplifier module to incorporate in SKYLINE door entry panels. It is the module (audio unit) that incorporates the electronic circuits necessary for the operation of the audio system, door opening, etc. in door entry installations. It has volume adjustments, both in the street-house and house-street direction, so that the installer can adjust the optimum level. The SKYLINE electronic and video door entry panel is a robust and elegant panel that stands out for its durability and beauty, strength and reliability. SKYLINE is Fermax's line of profile and modular composition door entry panels. The line is made up of 8 frames of different sizes where the different modules are easily fitted: buttons, card holder, amplifier, access control, etc. Frames allow a certain number of modules to be attached. There are two sizes of modules: V and W. The W modules are twice as long as the V modules. Measurements Modules. Module V: 105.2x47.5 mm (width-height). Module W: 105.2x95 mm (width-height). It is possible to combine two or more plates, as long as they are from the same series, to have a greater capacity of buttons and accessories. Conventional System: uses 4 wires common to the entire installation plus 1 call wire (or call return) per dwelling. Recommended in small/medium sized buildings (up to 50 residents approx.), with various entrances and a concierge unit.
