

Product sheet

**FERMAX 1811 | 540ABD MAX
module lock release mechanism**

Brand: FERMAX

Reference: FERMAX 1811

The electric mechanism is a device that is installed in the door frame to control its opening from a remote place by means of an electric device. In an electronic door entry installation, it is possible to activate the mechanism at the entrance to the building and allow visitors access from the telephone or home monitor by pressing the door opener 'key' button. A door opener is made up of an electric mechanism and a frame or cover depending on whether it is flush-mounted or surface-mounted.
