FERMAX 3610 | MEMOKEY reader 100 codes

Brand: FERMAX

Reference: FERMAX 3610

Telephone type keyboard that allows the opening of the door by entering a previously programmed code of up to 6 digits. Autonomous access control system. For installations in which simple access control is required, without registering incidents, to complement the electronic door entry system and allow neighbors access to the building, for example: offices, small offices, garages. Aluminum colour. CityLine Classic is the line of 'continuous profile' entrance panels for buildings. The PLATES are made of anodized aluminium, highly resistant to weathering and climatic changes. The design of the plate stands out for its curved-convex profile. A cellular rubber sealing gasket that is included ensures a perfect coupling of the plate to the wall, to prevent water leaks. It is possible to combine two or more plates, as long as they are from the same series. To fit them perfectly, a set of spacers must be used for every two plates that are installed between their embedding boxes.
