FERMAX 3244 | DUOX filter

Brand: FERMAX

Reference: FERMAX 3244

DUOX FILTER. DIN-4 rail format to facilitate installation inside an electrical equipment box, or they can be screwed directly onto the wall. The source cannot be connected directly to the bus, given the characteristics of the DUOX System, since the power supply and the data go through the same wires. This requires the Connections Module. The Power Supply Connection Module must be connected directly to the bus with the shortest cable distance possible. This module prevents the power from disturbing the operation of the rest of the signals that circulate through the system and will also be the one that allows connecting more sources if the system requires it.
