SIMON 73160-39 | Illuminated push button

Brand: SIMON

Reference: SIMON 73160-39

10A 250V push button with built-in light and Simon 73 screw terminal connection system. With the push button from the Simon 73 Loft collection, you will obtain elegant and sophisticated finishes as the perfect complement for a design suitable for surface or channel installation, with minimal thickness. . This button has a built-in light with a consumption of 0.55 milliamps and the signaling function can be implemented by means of a signaling support and a cover with a viewer. In addition, it is compatible with power supplies with a voltage of 250 Volts and intensity of 10 Amps with amplitude modulation (AM). Designed with screw terminal connection, its components are made of metallic materials insulated with halogen-free thermoplastic, for greater protection in case of fire. It can reach a temperature range of 5 to 40 °C and maximums that oscillate between -25 and 50 °C. The Simon 73 Loft pushbutton has tilting operation and accepts a cable section of 1.5 to 2.5mm and 13mm stripping. Functionality, innovation and designs that adapt to all types of spaces in the Simon 73 Loft collection.
