

Product sheet

DX3 voltage release trip coil 110-415V

Brand: LEGRAND

Reference: LEGRAND 406278

The Emission Disconnecter is a device that guarantees the remote trip of a circuit breaker, inter differential, differential circuit breaker or trip intersection. Here are some of its technical characteristics:

- ET, MT and DA control auxiliaries.
- Voltage emission triggers (ET): from 110 to 415 V~.
- Number of modules: 1.
- They accept the passage of the comb.
- Compatible with DX³ Auxiliaries, motorized controls and DX³ automatic reclosers.
- They are mounted to the left of the devices.
- Mounting possible per device: 3 auxiliaries of which 1 control or release auxiliary.
- Auxiliaries common to circuit breakers, differential circuit breakers, differential switches, disconnecting switches.
- They are not adapted to type B differential switches.

In summary, the Emission Disconnecter is a high quality control device and security that guarantees remote firing of a wide range of electrical devices. With a comb-through capability and compatibility with other devices such as DX³ Auxiliaries, motor drives, and DX³ automatic reclosers, this product is highly adaptable and functional for many electrical applications. It is important to note that it is not compatible with type B differential switches.

Specifications

High	2,6
Width	8,6

EAN	3245064062787
Manufacturer	Legrand
# Elements	1
Weight (kg)	0
Nominal voltage (V)	415
