Description

Bi-component polyester resin WITHOUT STYRENE for anchoring and fixing bolts, screws, rods, etc. on concrete, brick, stone, wood, etc. Collak 48603.
Supplied with two applicator cannulas. Reusable container.

Format: 280ml.
Reference: 48603 by Collak
Specifications:
Bi-component polyester resin WITHOUT STYRENE for the anchoring and fixing of bolts, screws, rods, etc., on the main construction materials (cement, concrete, brick, stone, ceramics, wood, etc.). It allows elements to be fixed on hollow or compact supports.
Applications:
COMPACT MATERIALS: Fasteners for heavy loads in solid brick, porous concrete and lightweight concrete. Suitable for peripheral fixings due to the anchorage without expansion pressure. Also suitable as a repair mortar or as a bonding mortar for concrete pieces. Fixation of anchor bars, threaded bushings, reinforcing iron, profiles, etc.
Applicable to various solid bricks. The cartridge can be used up to the stated expiration date by changing the static mixer or closing it again with the sealing cap. Waterproof bond. Possibility of exact dosage of the mass by means of a scale.
HOLLOW MATERIALS: Applicable for medium load ranges. The injection plug can be used for vertically perforated bricks, calcareous sandstone perforated bricks, lightweight concrete hollow blocks and for hollow concrete blocks. Suitable for fastening facades, canopies, wooden constructions, metal constructions, metal profiles , consoles, railings, grills, sanitary objects, pipes, cable lines, etc.
