Description

The 8-bottle wine cellar is a perfect solution to store and keep your wines at the right temperature. With temperature control from 4°C to 22°C, you can keep your wines at the perfect temperature for tasting.

Thermoelectric refrigeration ensures uniform and efficient cooling, while the LED touch screen allows easy control of temperature. In addition, the double glass insulates heat and helps maintain the right temperature.

The anti-vibration system keeps your wines stable and protected, while the wine cellar is very quiet. The ON/OFF interior light allows internal lighting of your bottles, allowing you to see the bottles clearly.

The wine cellar has a capacity of 8 bottles (22 liters), with a power of 64W and width measurements

317mm, height 576mm and depth 487mm. It is a compact and efficient solution to store and keep your wines at the right temperature.

In short, the 8-bottle wine cellar is an excellent option for those who want to keep their wines at the right temperature for tasting . With its efficient refrigeration, LED touch screen and anti-vibration system, it is a safe and practical solution for storing your wines.
