Description

The **Form Hammer** of **Reference 502060004** is a tool that combines power and precision to tackle a variety of demolition and extraction tasks in the field of construction and DIY . Weighing in at 450 grams, this hammer offers the perfect balance of strength and control.

The hammer's **fiberglass** handle is a key feature that contributes to its durability and comfort during use. The fiberglass absorbs vibrations and impacts, reducing user fatigue and improving the experience on long jobs.

Additional technical features of the **Forming Hammer** include:

- **450 gram weight:** The right weight of the hammer provides the power needed for demolition work, while allowing comfortable and precise handling.
- **Double claw on the back:** The double claw on the back of the hammer is a valuable feature that makes it easy to remove nails and objects efficiently.
- **Colorful design blue and grey:** The design in these colors provides an attractive and professional appearance.

The **Forming Hammer** is especially useful in various situations:

- **Demolition work:** Perfect for tasks that require the removal of nails and other objects in construction and renovation projects.
- **Demolition projects DIY:** In home improvement activities involving demolition and removal work.
