Description

The recessed tilting rings are a practical and versatile solution for the installation of dichroic lamps in ceilings and recessed surfaces. Designed specifically for this type of lamp, they provide a secure hold and allow you to adjust the lighting angle easily and precisely.

Each tilting ring includes a GU10 lamp holder, which makes it easy to install and replace the lamps. The manufacturing material used is aluminum, which guarantees durability and long-term resistance, as well as efficiently dissipating the heat generated by the lamps.

With a round shape and a diameter of 100 mm, these tilting rings offer an aesthetic and discreet appearance that blends seamlessly into any setting. Their 25 mm thickness makes them ideal for spaces with height restrictions.

The maximum power supported by these tilting rings is up to 50W, which allows the use of high-luminosity dichroic lamps to achieve the desired lighting. The white color of the rings provides a clean

and modern appearance, adapting to a wide range of decoration styles.

The 72 mm recess dimensions ensure a precise fit in most ceilings and recessed surfaces , providing a safe and stable installation. Each box contains 10 units of swing rings, making it easy to purchase and stock larger-scale lighting projects.

Specifications

Colour	White
Diameter embedment (mm)	72mm
EAN	8433373052260
Manufacturer	GSC
Measures	100x25mm
Weight (kg)	0,114
Battery included	No
Type of installation	Flush-mounted
