[View product online](#)**Description**

The products included in the extensive catalog of the Simon 44 Aqua series are characterized by perfectly combining the most innovative design with avant-garde lines and maximum safety in the mechanisms. A good example of this is the Frame for embedding boxes of one element. It has dimensions of 104x95 mm and the direction of its installation can be done horizontally or vertically. Another of its great advantages is the great resistance of its structure, which has been manufactured with the best thermoplastic components, which avoid the negative consequences of any impact or blow it may suffer. In addition, thanks to this material, the frame maintains its qualities as the first day despite being used frequently. For this reason, public and private buildings are increasingly enjoying this accessory. Impossible to ask for more for less.

Specifications

Colour	White
