Description

This surface base from the Simon 44 Aqua range is prepared to provide an electrical outlet for an element. This product has a surface of 84 x 76 millimeters and 33 millimeters deep. Its features make this base ideal for installation in any location. The bases of the Simon 44 Aqua series are made of high-quality plastic material that is highly resistant to heat, with the aim of increasing product safety and preventing possible accidents. In this sense, the innovative material used for its manufacture is thermoplastic and can withstand higher temperatures than usual for the peace of mind of the client and user. The versatility of the Simon 44 Aqua surface base allows it to be installed very simply and quickly, and it can also be done both horizontally and vertically, thus expanding its possibilities of use in rooms at home, office or apartment.
