7mm Combination Wrench

Brand: COFAN

Reference: COF 09602002

Polished combination wrenches, designed to tighten/loosen nuts or hexagonal head screws. The profile with the ratchet mechanism maximizes the contact area with the nut and allows for quick tightening, since the wrench does not have to be replaced each turn. Fixed profile allows for better nut access and tight wear. The 72 teeth of the ratchet profile allow the wrench to be operated with a 5-degree ratchet angle, making it easier to work in confined areas due to the small space required. This also allows you to increase productivity without wasting time repositioning the key. Chrome vanadium steel provides high resistance.
