Description

The Bike/Scooter Front Light is an essential companion for your bicycle or scooter adventures, whether day or night. With an impressive 800 lumens and 7 versatile operating modes, this light provides you with the illumination you need to travel safely. One of the most notable features of this light is its powerful illumination, which is achieved thanks to high-quality OSRAM and COB LED bulbs. These bulbs offer a bright, efficient light that effectively illuminates your path, allowing you to see clearly and be seen by other road users. The battery in this light is a real gem. With a capacity of 2000 mAh, it offers you a runtime of up to 5.5 hours, making it perfect for long trips. Plus, the battery is USB rechargeable, allowing you to conveniently charge it anywhere with access to a USB port. Charging time is fast, just 4 hours for a full charge. The flashlight holder has also been designed with user comfort in mind. It incorporates a safety tab that allows you to release the flashlight from the holder without having to completely disassemble the holder. Additionally, you can rotate the flashlight to adjust the direction of the light to your needs. With 7 different operating modes, this light is incredibly versatile. You can choose between low beam, high beam, strobe and more, depending on driving conditions and your personal preferences. This allows you to customize the light to your environment and conserve battery when needed. The beam range is another strong point of this light. With an effective range of 180 meters, it illuminates your path and helps you anticipate obstacles, significantly improving your safety on the road. Even in rainy conditions, you won't have to worry as this light has an IPX4 water resistance rating.
