Description

The **White VIRTUAL LED Flexo** is an exceptional lamp that combines modern and decorative design with exceptional functionality. Made of silicone, metal and ABS, this flexo features a flexible gooseneck and soft touch that allows you to direct the light precisely.

A standout feature is its ability to operate wirelessly, designed to be connected to the mains, but with the ability to operate for up to 2.5 hours without cable if fully charged. This makes it ideal for areas where outlets are not available.

The 360° orientation allows you to direct the light exactly where you need it, making it a perfect choice for bedside tables, studies, reading or work areas. Turning on and off is simple and tactile, and the lamp has a timer that can be programmed to turn off automatically after 45 minutes, which is useful to prevent the light from being left on unnecessarily.

Lighting It is completely customizable, with a power of 8 watts, 595 lumens and five light intensities with a temperature of 4000°K (Natural White). This versatility allows you to adjust the light to your specific needs.

Extreme flexibility is another key feature. You can twist, bend and fully stretch the gooseneck to obtain the desired shape and light field, meaning it can adapt to a variety of situations and configurations.

With dimensions of **52x16, 5x16.5 centimeters**, this flexo is versatile enough to adapt to different spaces without compromising its functionality. Its integrated LED technology is energy efficient and offers high quality lighting.
