Description

Base multiple three outlets with switch 5 meters of cable GSC-0000793

The **bases multiple** with extension cable are very practical for the multiple connection of several electrical appliances. You must take into account the length of the cable, and above all the maximum power supported.

In our store you will find only bases multiple with a section of cable of minimum 1.5 mm. Thanks to this section, the bases multiple can support up to 16A, that is to say, 3500 W consumption. It is very important to have the maximum power controlled, since a misuse of the base, or a top-loading, can cause problems in electronic appliances or in the electrical installation.

Another one of the characteristics of the **bases multiple** that we have available is your connection with earth. This feature increases security in the home, in the office or at the commercial premises where they are connected.

Because there are several lengths of cable and various elements plug-in available, read the characteristics of each product to choose the one that you need.

Specifications

Colour

White

EAN	8436021947932
Manufacturer	GSC
Length	5 metros
# Elements	3 elementos
Weight (kg)	0,675
Maximum power (W)	3.500 W
Protection	IP20
Nominal voltage (V)	230V
