Description

The 5 Outlet Multiple Base with Switch is a practical and safe solution to manage your electronic and electrical devices at home or office. With five available outlets, this device allows you to connect multiple devices at once, giving you convenience and efficiency in your workspace or at home.

A standout feature of this multi-dock is its individual and general switch. This means you can turn each outlet on and off independently or cut power to all outlets at the same time. This not only saves you energy, but also gives you greater control over your devices and electrical safety.

With a maximum power of 3680W and an intensity of 16A, this power strip can handle heavy loads without any problem. Whether it's office equipment, appliances, or electronic devices, this power strip is

capable of powering them safely and efficiently.

Safety is a priority with this power strip. It features surge protection, protecting your devices from harmful voltage spikes. In addition, it incorporates child protection, ensuring that the little ones are protected against possible electrical accidents.

The white design of this multiple base adapts to any environment and its resistant PC material guarantees long-term durability. The 1.5 meter cable provides you flexibility in the placement of the multiple base and its H05VV-F cable type with 3x1.5mm cable section ensures stable power transmission.

In summary, the Multiple Base 5 Outlets with Switch offers a perfect combination of power and safety. With multiple outlets, individual and master control, and safety features, it's a smart choice for any environment. Keep your devices safe and running efficiently with this reliable and versatile multi-dock.
