Description

The S14d Lamp Holder is the perfect solution to ensure a secure connection for your lamps. Its specific design for S14d sockets makes it compatible with a wide range of lamps, providing a reliable connection.

With precise dimensions and high-quality construction, this lamp holder ensures durability and trouble-free operation. Its white finish makes it discreet and suitable for various lighting applications.

How to Choose the Right Lamp Holder

When selecting a lamp holder for your linestra, it is essential to understand the differences between the types **S14d** and **S14s**. Here we offer you a simple guide to make the right decision:

S14d Lamp Holder: Ideal for Simple Linestras

- **Use:** Perfect for linestras that have with **a single socket**.
- **Features:** Designed for straight lamps that have a single connection point.
- **Ideal for:** Simpler, smaller linestra lamps.
- **When to choose it:** If your linestra has a single socket, the S14d lamp holder is the appropriate choice.

S14s Lamp Holder: For Larger Linestras

- **Use:** Suitable for linestras that have **two sockets** strong>, one at each end.
- **Features:** This type has two connection points, offering greater support and stability.
- **Ideal for:** Longer and larger linestra lamps.
- **When to choose it:** If your linestra has two sockets, the S14s lamp holder is your best option.

Tips for Selection

- **Identify your Linestra:** Before deciding, check if your linestra has one bushing or two.
- **Consider Size and Functionality:** Larger, more complex lines generally require the S14s lampholder, while smaller, simpler lines are better suited to the S14d.
