Description

The Daily/Weekly External Digital Timer is an essential tool for precise control of your electronic devices. With a maximum power of 3680W and a capacity of 16A, this timer is capable of handling a wide variety of electrical loads, from lamps to appliances and irrigation systems.

One of the most notable features of this timer is its versatility in programming. You can set it to operate

daily or weekly depending on your specific needs. This allows you to automate tasks, such as turning on your home lights at dusk and automatically turning them off after a programmed time.

The built-in LCD display is easy to read and allows you to conveniently configure and check your settings . Additionally, this digital timer includes a 1.2V Ni-Mh battery, meaning your settings will be maintained even in the event of power outages, ensuring your devices turn on or off as scheduled.

To ensure the safety of your home, this timer has child protection features, which prevents little ones from tampering with the settings. In addition, it offers a variety of programmable modes, such as manual ON/OFF, AUTO mode, 12/24 hour settings and random mode, which add flexibility to the automation of your devices.

The timer design is elegant and compact, in white, making it suitable for any environment. Its dimensions of 60x90x140mm allow it to fit discreetly in your plugs or outlets.
