Description

The EDM LED rear bicycle signaling flashlight is an essential accessory to ensure safety when traveling by bicycle. With several power settings, it emits a powerful red light that will make you visible to other road users. Its 3.7v 280mah battery offers a duration of approximately 7 hours, so you can use it during your longest trips without worrying about running out of power. Plus, it includes a USB cable so you can easily recharge it at any time.
