Leveling wedge 100 pcs

Brand: COFAN

Reference: COF 09105001

Achieve perfect leveling on your siding projects with reusable leveling shims. Precision manufactured from black polypropylene, these shims are designed to complement our leveling clips (sold separately), ensuring proper, clean separation between siding joints and keeping each piece equidistant. These leveling wedges make it easier to level parts, significantly reducing work time. Suitable for use on floors, walls and large coverings, these wedges prevent the natural movement of the tiles during the adhesive setting process. The method of use is simple: place the leveling clips near each corner of the pieces, add the leveling shims and press until a level surface is achieved. Once the adhesive has dried, easily remove the leveling shims and leveling clips to reveal a perfectly level surface. The reuse of these wedges makes them an economical and sustainable tool for professionals. Each bag contains 100 units of leveling wedges measuring: 80 x 17 x 14 mm, offering a complete solution for projects of any size.

- Measurement: 80 x 17 x 14 mm
