leveling pliers

Brand: COFAN

Reference: COF 09105006

Pliers for tile leveling system made of high quality polypropylene. It is specially designed to avoid damaging the ceramic during the leveling process. This tool is essential in projects that involve rectified ceramics, porcelain tiles, coatings and large formats. It has a scale that references the thickness of the piece, allowing you to easily adjust the tool with the required pressure at the appropriate height. Its ability to ensure leveling between tiles is essential to reduce work time and prevent unwanted movements between pieces, especially during the setting of the mortar. With a minimum joint of less than 1 mm and a range of use from 3 to 30 mm thick, the pliers guarantee precise and professional results in tiling, coatings and facades.

- Thickness [mm]: 3 to 30 mm
