Description

The **Hexa cable management column** is designed to keep cables organized under the office table and prevents them from getting tangled.

In addition, it allows the cables to be hidden inside thanks to its 14 circular vertebrae, which **can be left free** in an articulated manner **or in a fixed position** in a tubular manner.

These vertebrae are assembled under pressure and they are easily disassembled, and the height can be adapted up to a maximum of 770 mm. It also has anchors that are screwed to the table, and a zamak base to give strength and stability to the whole.

The cable gland column is made of plastic with a trendy black finish in the current market, which allows its integration into the furniture.
