STEIN steel rutile electrode Ø2.5x350mm

Brand: STEIN

Reference: ALFA 44360

STEIN Rutile Steel Electrode Ø2.5x350mm

The STEIN rutile electrode is ideal for welding structural steels and thin sheets. It offers a smooth fusion and uniform beads, making spot welding easier. parts thanks to its easy ignition. Designed for currents of 25-50, it is an essential tool for precise and efficient welding jobs.

- Diameter: Ø2.5mm
- Length: 350mm
- Current: 25-50
- Presentation: Box of 120 units
- Application: Structural steels and thin sheet metal
- Characteristics : Smooth melting, easy lighting

Description

STEIN Rutile Steel Electrode Ø2.5x350mm: Precision and Efficiency in Welding

The **STEIN rutile electrode** is the perfect choice for those looking for quality and precision in their welding jobs. Designed specifically for structural steels and thin sheets, this electrode offers a superior welding experience thanks to its smooth fusion and easy ignition. With a diameter of Ø2.5mm and a length of 350mm, it adapts to a wide variety of applications, guaranteeing uniform and professional results.

One of the main advantages of the STEIN rutile electrode is its ability to operate at currents of 25-50, making it a versatile and efficient tool for different types of projects. Its design facilitates the spot welding of parts, allowing for faster and more precise work. In addition, its presentation in a box of 120 units ensures that you will always have enough electrodes on hand to complete your tasks without interruptions.

The characteristics of the **STEIN rutile electrode** not only improve the quality of the weld, but also optimize working time. The smooth fusion of the electrode allows for the creation of uniform beads, reducing the need for touch-ups and guaranteeing a clean and professional finish. Its easy ignition minimizes preparation time, allowing you to concentrate on what really matters: the quality of your weld.

In short, the **STEIN rutile electrode Ø2.5x350mm** is an essential tool for any welding professional looking for efficiency and precision. Its design and characteristics make it ideal for applications in structural steels and thin sheets, always ensuring optimal performance. With the STEIN rutile electrode, every weld is a masterpiece of quality and precision.

Specifications

High	00, 4
Width	5, 00
EAN	8425160443603
Manufacturer	ALFADYSER
Long	36, 00
Material	Steel
Measures	Ø2, 5x350mm
Weight (kg)	8, 1
Depth	#iREF!
Cable cross-section (mm²)	Ø2, 5x350mm
