WORGRIP electronic welding screen

Brand: WORGRIP

Reference: ALFA 40813

WORGRIP Electronic Welding Helmet

The WORGRIP welding helmet offers advanced protection with automatic light regulation, ideal for various environmental conditions. Its ergonomic and adjustable design ensures comfort during prolonged use, while its operation with solar panel and CR 2450 battery ensures energy efficiency.

- UV/IR protection grade: 9-13 DIN
- Clear protection: 4 DIN
- 2 independent light sensors
- Adjustable headgear
- Operation with solar panel and CR 2450 battery
- Two positions: welder and grinder
- Adjustable delay for greater comfort

Description

WORGRIP Electronic Welding Helmet

The **WORGRIP Electronic Welding Helmet** is the ideal solution for those seeking protection and comfort during their welding tasks. Designed to offer advanced protection, this helmet features an automatic light regulation system that adapts to various environmental conditions, always guaranteeing maximum safety for your eyes. With a UV/IR protection rating of 9-13 DIN, this helmet ensures that you are protected against harmful ultraviolet and infrared rays, while its clear 4 DIN protection allows for optimal visibility when you are not welding.

The WORGRIP's ergonomic and adjustable design provides exceptional comfort, even during prolonged use. Its adjustable headgear adapts to different head sizes, ensuring a perfect fit and avoiding discomfort. Furthermore, its operation with solar panel and CR 2450 battery not only guarantees energy

efficiency, but also reduces the need for frequent battery replacements, which translates into significant savings in the long run.

The WORGRIP welding helmet is equipped with two independent light sensors, which automatically detect changes in light intensity, adjusting the darkness of the visor accordingly. This is especially useful in dynamic work environments where light conditions can vary quickly. In addition, it offers two positions: welder and grinder, making it versatile for different types of work.

An additional benefit is its adjustable delay, which allows you to customize the response time of the visor when changing from dark to light, providing greater comfort and reducing eye fatigue. With the WORGRIP, you don't just get a welding helmet, but a reliable tool that improves your work experience, protecting your eyesight and increasing your productivity.

Specifications

High	30, 00
Width	00, 26
Colour	Black
EAN	8425160408138
Manufacturer	ALFADYSER
Long	23, 00
Weight (kg)	0, 76
Depth	#iREF!
Adjustable	Yes
